

# ARWIN DELASAN

## WEB DEVELOPER

Aspiring Full Stack Developer with a solid foundation in both front-end and back-end technologies, seeking opportunities to leverage my skills and contribute to innovative projects. Adept at working in agile environments, problem-solving, and continuously learning new technologies to stay current in the ever-evolving tech landscape. Eager to apply my coding skills, collaborative mindset, and enthusiasm for development to a forward-thinking team.

---

Role: Creating new ideas and new features, implementing code from the backend and frontend.

---

### FEATURED PROJECTS

- **DOORM**  
A web application catered for students to simplify their dormitory hunting experience. 'Doorm' connects students with available listings and allowing property owners to easily showcase their spaces. Our user-friendly platform streamlines the rental process, making it effortless to find or list dormitory accommodations.
- **STUDYFY**  
Studyfy is an online platform where students can ask and share questions about a wide range of subjects, fostering a supportive and interactive learning community.
- **UPOKEMON**  
An imitation of the popular RPG game, Pokemon, a role-playing game based around building a small team of monsters to battle other monsters in a quest to become the best.
- **YELPCAMP**  
YelpCamp is a website where users can create and review campgrounds. In order to review or create a campground, you must have an account. This project was part of Colt Steele's web dev course on udemy.
- **BEACON**  
A career guidance application that leverages generative AI to create personalized visual roadmaps for users, guiding them toward suitable career paths based on their profile information.
